C# ALGORITHMS & DATA STRUCTURES

SEARCHING FOR DATA CHALLENGE

GOAL

Using the given text file (primary.txt), display each line of the file that matches a search box on a form application.

BONUS

Instead of returning the entire line, search the given text file (bonus.txt) and pull out all the phone numbers in the file that match the pattern (123) 555-1212(make sure there is a space both sides).
